LinkedIn: www.linkedin.com/in/praveena-pawar-ai/ | Portfolio: portfolio-alpha-opal-81.vercel.app/

SKILLS

Programming Languages: Python, SQL

Data Science: NumPy, Pandas, Scikit-learn, EDA, Feature Engineering, Model Evaluation, Matplotlib, Seaborn

Machine Learning: Classification, Regression, Clustering, Decision Trees, Random Forest, XGBoost

Statistics: Probability, Descriptive Statistics, Hypothesis Testing

Frameworks & AI: FastAPI, Flask, Streamlit, OpenAI API, Agentic AI

Developer Tools: Git, GitHub, JupyterLab

Core Computer Science: Data Structures & Algorithms, Time & Space Complexity

PROJECTS

Hybrid Product Search & Recommendation System

Tech Stack: Python, FastAPI, Streamlit, Pandas, NumPy, Scikit-learn, Git, GitHub

GitHub: github.com/praveena-pawar/hybrid-product-search-engine

- Developed an end-to-end hybrid product search and recommendation system using **TF-IDF**, **cosine similarity**, and **popularity-based ranking** on an Amazon dataset with **692 products** and **6.3K reviews**.
- Performed **data preprocessing**, **feature engineering**, and relevance ranking on an Amazon products dataset using Pandas, NumPy, and Scikit-learn.
- Built a **FastAPI REST API** with search and recommendation endpoints and integrated it with a **Streamlit** frontend for real-time product search and recommendations.
- Deployed the application using **Render** (FastAPI backend) and **Streamlit Community Cloud** (frontend), delivering a fully functional web application.

CreditWise – AI Credit Risk Prediction System

Tech Stack: Python, XGBoost, FastAPI, Streamlit, Pandas, Matplotlib, Seaborn, Scikit-learn, Render, Git, GitHub

GitHub: github.com/praveena-pawar/creditwise-ai-credit-risk-prediction

- Built an end-to-end AI-powered Credit Risk Prediction System by performing **data cleaning**, **EDA**, **feature engineering**, **label encoding**, and **one-hot encoding**, then trained and evaluated **3 machine learning models**, selecting **XGBoost** as the best-performing model with **92.5% accuracy**, **84.8% precision**, **91.8% recall**, and **88.2% F1-score**.
- Developed a production-ready **FastAPI REST API** for real-time loan approval prediction, delivering prediction results with confidence scores through validated REST endpoints.
- Designed and deployed an interactive **Streamlit** dashboard integrated with the FastAPI backend via HTTP requests, providing real-time predictions, confidence metrics, risk assessment, and applicant summaries.

AI Personal Assistant

Tech Stack: Python, Flask, Groq API, HTML, CSS, JavaScript, Marked.js, Git, GitHub, Vercel

GitHub: github.com/praveena-pawar/AI-Personal-Assistant

- Developed an AI-powered Personal Assistant using **Flask** and **Groq API** for conversational AI and intelligent email summarization.
- Built a responsive web application with **Markdown-rendered responses**, **session-based chat history**, and **conversation memory** for an interactive user experience.
- Implemented secure API key management using **environment variables** and deployed the application on **Vercel** with version control through **GitHub**.
- Enhanced usability with **copy-to-clipboard**, **loading indicators**, and a clean, responsive dashboard interface.

EDUCATION

Bachelor of Computer Applications (BCA)

Administrative Management College, Bengaluru

July 2024 – June 2027
